

VCA Annual General Meeting

Street Light Update – April 8, 2021

By Mona Babin, VCA President

In November and December, 2020, 598 streetlights were converted to decorative LED lights throughout the Town of NOTL, including The Village. This significantly reduced carbon emissions and costs.

In The Village,

- Light bulbs and fixtures were replaced on the following streets: Brock, MacDonnell, Murray, Kirby, Jordan, Blackbird, Colonel Cohoe, Elizabeth, Samuel, and Garrison Village Drive
- The new lights follow current required guidelines but are a cool white versus a warm white
- The diffuser (glass around the top fixture) has been removed on all lights on the above-mentioned streets
- Light fixtures on Perez, Rampart and Moseby were installed by Traditional Neighbourhood Developments Inc with LED lights and therefore will not need to be changed

LIGHTS OUT?

If the light on your property or anywhere in The Village goes out (or stays on all the time), please report it through the town website (<https://www.notl.org/streetlighting>) and it will be fixed.
